

BARTŁOMIEJ KUCHARCZYK

PROFILE

Young, self-reliant backend developer interested in taking the next step on the career path. So far I mainly worked with languages based on JVM (mostly Java but also Groovy and Kotlin) combined with Spring boot. Recently I became an enthusiast of hexagonal architecture. In my current job I was mostly responsible for the backend of projects that I worked on, but as part of development and maintenance of internal application, I worked also as frontend developer (Angular). Considering that, I'm open to work as fullstack developer. I'm a very organized person with a high level of focus. I enjoy sinking into big tasks, and successfully resolving those. For example as a member of a development team I had the opportunity to create a library implementing inbox pattern for other microservices in a project. When it comes to the code review process, I do it thoughtfully and carefully. In my opinion it's a key element when it comes to guaranteeing consistency with arrangements (especially when it comes to, for example, CQRS usage) and cohesion with business requirements. As a young developer I eagerly absorb knowledge and value people willing to share their experiences and good practices taught on their career path. Personally I'm hoping to become a valued element of the organized team and a support to less experienced developers.

HOBBY

- Football,
- Long walks with dog,
- PC hardware,
- Fantasy (mainly cyberpunk)

WORK EXPERIENCE

Envelo

09.08.2021 – 31.10.2021 **Envelo Academy (Internship)**
01.11.2021 – 31.10.2023 **Junior Developer**
01.11.2023 – currently **Mid Developer**

Description:

- Software development,
- Creating unit and integration tests,
- Self-reliant maintenance and development of internal application created as part of internship

EDUCATION

Warsaw University of Life Sciences Degree - Computer Science, Engineer

01.10.2019 - 01.05.2023
Grade: 5.0
Rector scholarship for GPA.

SKILLS

Programming languages:

- Java ☆☆☆☆
- Groovy ☆☆☆
- Kotlin ☆☆☆
- Typescript ☆☆☆

Frameworks:

- Spring boot ☆☆☆☆☆
- Quarkus ☆☆☆
- Angular ☆☆☆

Technologies:

- Docker ☆☆☆☆
- PostgreSQL ☆☆☆☆☆
- Liquibase ☆☆☆
- Redis ☆☆☆
- Kafka ☆☆☆
- Spock ☆☆☆☆☆
- Junit ☆☆☆☆☆

Other:

- Git ☆☆☆☆☆
- Maven ☆☆☆☆☆
- Hexagonal architecture ☆☆☆☆☆
- CQRS ☆☆☆☆☆
- DDD ☆☆☆☆☆
- English language B2
